
Limited Equipment Warranty

Sortation, conveyance, and integrated controls systems · Commercial and industrial customers

1. Coverage period

1.1 Cobalt Ridge Automation warrants each unit of Covered Equipment against defects in material and workmanship for twenty-four (24) months from the date of Substantial Completion, or thirty (30) months from date of shipment, whichever expires first.

1.2 Replacement components installed by Cobalt Ridge or an Authorized Service Provider carry the remainder of the original term or ninety (90) days from installation, whichever is longer.

1.3 Consumable items listed in Schedule B, including belts, rollers, photo-eyes, and filter elements, are excluded from this Section and are governed by Schedule B service intervals.

2. Scope of remedy

2.1 The Customer's sole remedy is, at Cobalt Ridge's election, repair of the affected component, replacement with a component of equal or superior specification, or issuance of credit not exceeding the depreciated value of the affected component.

2.2 Labor and travel are covered during Standard Service Hours (07:00 to 17:00 local, Monday through Friday, excluding published holidays). Work performed outside Standard Service Hours is billable at the prevailing premium rate unless a Priority Response Addendum is in force for the Site.

2.3 This warranty does not extend to consequential losses, including lost throughput, missed shipping windows, spoilage, contractual penalties owed by the Customer to third parties, or overtime incurred by Customer personnel.

3. Exclusions

Coverage is void as to any affected component where the failure is attributable, in whole or in material part, to any of the following:

3.1 Unapproved modification. Any alteration of mechanical assembly, drive selection, or controls parameters that departs from the Released Configuration Baseline for the Site, unless the alteration was authorized in writing by Cobalt Ridge Engineering prior to being placed in service.

3.2 Non-approved components. Installation of any drive, motor, gearbox, controller, or safety device that is not listed on the Approved Parts List for the applicable baseline revision. Components described by a third party as "equivalent", "compatible", or "form-fit-function" are not approved parts for purposes of this Section unless separately qualified in writing.

3.3 Service by unauthorized parties. Repair, replacement, or controls adjustment performed by any party other than Cobalt Ridge or an Authorized Service Provider, where such work is a contributing cause of the failure.

3.4 Operating conditions. Operation outside the environmental, duty-cycle, or throughput limits stated in the System Design Specification, including sustained operation above rated case temperature.

3.5 Maintenance. Failure to perform and record the preventive maintenance tasks in Schedule B at the stated intervals.

4. Prior authorization

4.1 The Customer shall obtain written authorization from Cobalt Ridge before performing, or permitting any third party to perform, any of the following on Covered Equipment: replacement of a drive or motor assembly; modification of controls parameters governing drive current, acceleration ramp, or thermal cutback; alteration of divert timing; or any change affecting a safety-rated circuit.

4.2 Work performed without the authorization required by 4.1 does not automatically void coverage for unrelated components, but the Customer bears the burden of demonstrating that the unauthorized work was not a contributing cause of the failure under review.

4.3 Authorization requests are ordinarily answered within one (1) Business Day. Where the Customer reports a Line Down condition, Cobalt Ridge will endeavor to respond within four (4) hours, and may issue a Provisional Authorization permitting containment work to proceed pending full review.

5. Claims and evidence

5.1 Claims must be submitted within thirty (30) days of the Customer becoming aware of the condition. Claims submitted after ninety (90) days are time-barred except where the Customer demonstrates that the condition was not reasonably discoverable.

5.2 The Customer shall preserve and make available: alarm and event history covering the period from twenty-four (24) hours before the condition through restoration; maintenance records for the preceding twelve (12) months; records of any third-party work; and the failed component itself where replacement is claimed.

5.3 Failed components are the property of Cobalt Ridge upon issuance of credit or replacement, and shall be returned within twenty-one (21) days of the Return Material Authorization. Failure to return a component may result in reversal of credit.

6. Commercial exceptions

6.1 Nothing in this warranty limits Cobalt Ridge's discretion to authorize goodwill assistance outside strict coverage where it determines that doing so is commercially warranted. Any such assistance is granted case by case, does not establish a course of dealing, and does not waive any exclusion in Section 3.

6.2 Goodwill assistance exceeding the delegated authority of the assigned Warranty Resolution Lead requires concurrence from Finance. Delegated limits are maintained in the Warranty Approval Matrix and reviewed annually.

7. Limitation

EXCEPT AS EXPRESSLY STATED, COBALT RIDGE MAKES NO WARRANTY, EXPRESS OR IMPLIED, AND SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. TOTAL LIABILITY UNDER THIS WARRANTY SHALL NOT EXCEED THE PURCHASE PRICE OF THE AFFECTED EQUIPMENT.
